ABOUT ME

Motivated and detail-oriented Electronics and Communication Engineering student with a strong interest in Embedded Systems, IoT, and real-time hardware development. I enjoy working on hands-on projects that combine sensors, microcontrollers, wireless communication, and intelligent control systems. I am passionate about building smart, efficient, and reliable embedded solutions that solve real-world problems. I am always eager to learn new technologies, explore innovative ideas, and contribute to impactful IoT and embedded projects.

PROJECTS

• SMART FOOD COURT MANAGEMENT SYSTEM

Developed a responsive web-based system to automate food ordering and delivery using HTML, CSS, and JavaScript.

• WI-FI CONTROLLED CAR (ESP8266)

Built a car prototype controlled via Wi-Fi using NodeMCU and integrated sensors for navigation.

• SMART AGRICULTURE WATER SUPPLY SYSTEM

Automated water supply using moisture sensors and microcontroller logic for precision irrigation.

• HOME AUTOMATION SYSTEM

Implemented IoT-based appliance control via smartphones for energy efficiency and convenience.

• SMART WATER TANK SYSTEM FOR GROUP HOUSING

Developed a centralized water monitoring and control system to manage water levels and reduce wastage.

• DRIVER SLEEP DETECTION & VEHICLE CONTROL

Designed a system to monitor driver drowsiness and trigger alarms for accident prevention.

INTERNSHIPS

- PNT Research Intern | IIT Tirupati

MEMBERSHIPS

- Student Member, **IETE** (Institution of Electronics and Telecommunication Engineers)
